

OVERTIME HEADACHE RACK

The most versatile headache rack available. Mount accessories, secure cargo, and protect your cab with this great looking aluminum rack.

Fits virtually all full-size pickups!

>>Mount Accessories

Each rack is pre-drilled with 3/8" holes to accept Overtime truck accessories, or you can easily custom drill holes to mount almost anything. Ask your dealer about accessory options available, including warning light brackets.

>>Aluminum Construction

Aluminum construction makes the Overtime Headache Rack tough, light weight, and corrosion resistant, unlike competitors' steel racks. The precision cut diamond plate window screen bolts in, with stainless steel hardware. Can be purchased with or without the window screen.

>>No Drill Installation

Mounts to 20" or longer Rugged Rails. Compression clamps secure the bed rails to the truck sides eliminating "tear out" problems associated with bolted down and stake pocket mounted racks. Mounting only involves drilling four holes in the rack and bolting it to the rails. No drilling of your truck bed!
